

LIDS WITH SOUL

ȘCOALA GIMNAZIALĂ NR 7, BUZĂU, ROMANIA

Instead of throwing away the small plastic lids, we collect them (thus protecting nature) and revalue them creating different objects. We collect plastic lids from PET, milk bottles, yogurt bottles, as well as shower gel bottles, shampoo, hair conditioner, clothes conditioner, dishwashing detergent, stick caps glues, lids from sprays or face and body creams and many more - practically from everything that resembles the plastic of PET

lids and has small dimensions.

"Small" is actually the word that fits the context very well - a PET glass lid is very "small" and insignificant on its own and it takes a very "small" effort to gather all the plastic lids in a container. But they together can become ART. So: "Think out of the TRASH box - recycle!" :)
